This is what I sent to BMW and Mercedes. I also copied Jim for VW.

Subject: SCR Workshop

Good Morning Andreas,

As one of the manufacturers with diesel vehicles using SCR aftertreatment, has Mercedes been following the recent events in California regarding SCR systems? ARB has announced a public workshop for July 20th in regard to diesel engines and vehicles using SCR. It is unclear just how light duty will be impacted, but LD may very well follow trends set by heavy duty resulting from this workshop. EPA may be represented at this workshop. Mercedes may be asked what it would take (timing) to implement some of the proposed HD solutions in LD.

Workshop Mail out:

This Mail-out may be accessed at this link:
